Product Name :	**Product Code :**
Female Catheterization Training Simulator	NLAB-MEDICALMODELAB11019

Description :

Female Catheterization Training Simulator

Technical Specification :

The genital inserts are placed into the anatomically correct lower abdominal model and held in place with magnets.

The material is soft and flexible: the labia are movable and can be separated. This way the student can practice all the necessary gestures for catheterization (e.g. disinfection).

The material gives a realistic feeling when inserting and removing the catheter into the bladder with realistic resistance and insertion depths.

General urethral catheterization process can be operated.

There are resistance when advantage the catheter through urethral sphincter.
