Product Name :	**Product Code :**
Induced Current Apparatus	NLAB-EDUSCHOOLEQ174051

Description :

Induced Current Apparatus

Technical Specification :

Demonstration Induction Coils consists of two coils wound on separate bobbins, one having many turns of fine wire & the other with few turns of heavy wire. It demonstrates that induced potentials are produced either by movement of a permanent or electromagnet or by a change of current in one coil, fitted with insulated 4 mm socket terminals & supplied with a soft iron core, outer coil is 12.5 cm long & is of 5 cm diameter.
