Product Name : Plug Flow Reactor, Straight Tube Type	Product Code: NLAB-EDUCATIONTVET16003
Description :	
Plug Flow Reactor, Straight Tube Type	
Technical Specification :	
Plug Flow Reactor, Straight Tube Type -	
The concentration of reactants varies along the length of the reactor but no	t in radial direction
The concentration of reactaine values along the longer of the reactor bat he	t in radial direction.
Rota meters are provided to measure the individual flow of Chemicals.	
The flow rate can be adjusted by operating the needle valves provided on r	espective Rota meter.
In an ideal Plug Flow Reactor (PFTR) there is no mixing in the direction	
of flow and complete mixing perpendicular to the direction of flow.	
This set-up is used to study a non-catalytic homogeneous reaction under a	mbient condition.
The set up consists of two feed tanks through which two reactants are fed t	o the reactor.

A straight tube type reactor kept horizontally and inclined upward at outlet from where samples are collected for analysis.

Pressure Regulator, Pressure Gauge and Safety Valve are fitted in the compressed air line.

The compressed air is used for circulation of feed.
