Single Spectrophotometer Wavelength Range 190-1100nm

**Product Code :**  
NLAB-EDUSCHOOLEQ45048

**Description :**

Single Spectrophotometer Wavelength Range 190-1100nm

**Technical Specification :**

A spectrophotometer is equipped with a 4-position cell holder for 10mm cells and features a large sample compartment for up to 100mm path length cells.

It is ideal for students to use in college, university, and general laboratory settings.

The expanded key panel input and the large LCD screen display allow for more room to work with, and a clear and easy reading of absorbance, transmittance, factor, and concentration levels.

The pre-aligned lamps are conveniently placed for easy replacement, while the optical parts are mounted on an aluminum foundation which provides a steady and firm base.

Its many functions include basic photometric mode, quantitative analysis, multi-wavelength tests and more.
