

Product Name :
Air Quality

Product Code :
NLAB-EDUSCHOOLEQ41001

Description :

Air Quality

Technical Specification :

Air pollution causes a wide variety of health concerns and comes from many different sources.

Your students will perform various hands-on activities to identify air pollution sources and the types of pollutants they emit.

These include man-made origins such as factories and vehicles as well as natural sources such as wildfires; microorganisms; windblown dust and pollen; and volcanic eruptions.

Your class will also conduct microscopic examinations of bacteria, fungi and other microorganisms found in the air.

Then they will apply their knowledge to develop ways to reduce this contamination.

Identify potential sources of air pollution.

Collect, observe and identify various airborne pollutants.

Study the effects of air pollution on plant and animal life.

Observe and identify the various microorganisms present in the air.

Class size - 40 students.
