

Product Name :
Analog Computing Trainer

Product Code :
NLAB-ENGINEERINGLB54045

Description :

Analog Computing Trainer

Technical Specification :

The board consists of operational amplifier circuits such as auxiliary circuit, Integrator circuit, differentiator circuit, summing circuit.

A comprehensive manual is provided for teaching and contains step-by-step instruction procedure to do the experiments.

The Analog Computing board provides an effective educational tool for studying and demonstrating analog computing techniques.

We are well-known manufacturers, OEM suppliers of Analog Computing Trainer for Applied Machines. Contact us for high quality Analog Computing Trainer for Applied Machines for schools lab, college lab, universities, research labs, various teaching and workshop training laboratories and industries in India.
