

Product Name :
Biology Lab DNA/Chromosome Staining Lab Activity

Product Code :
NLAB-EDUSCHOOLEQ23003

Description :

Biology Lab DNA/Chromosome Staining Lab Activity

Technical Specification :

Students prepare their own microscope slides, using the plant tissue, to view actual cells in different stages of mitosis.

Specially grown and preserved plant root tips are included in the kit.

Students will learn about cell division and gain valuable experience in techniques such as tissue staining and microscopic observation.

The material is grown and harvested under specific conditions to ensure maximum mitotic activity is occurring at the time of preservation, allowing for multiple examples of every stage of mitosis on each microscope slide prepared.

Students first prepare and stain their samples, then perform a cell squash for microscopic observation.

The kit contains enough material for 30 students working individually.
