

Product Name : Cystine Tryptone Agar	Product Code : NLAB-CHEMICALSIND21003
Description : Cystine Tryptone Agar	
Technical Specification : Cystine Tryptone Agar is a growth medium used for the identification of micro organisms. It can be used to determine if organisms can ferment various carbohydrates, including maltose, lactose, and sucrose. This approach can be used to type organisms because although strains quickly gain antibiotic resistance, they rarely gain the ability to metabolize new nutrients.
