

Product Name :
Electrical Arc Flash Arc Flash 25cal-cm2

Product Code :
NLAB-SAFETYLABP12003

Description :

Electrical Arc Flash Arc Flash 25cal-cm2

Technical Specification :

Product: 25cal Arc Flash Protective Suit

Grammage: 10.6oz/yd2 (360g/m2)

Material: ArcPro inherently flame retardant fabric

Style: Jacket, Hood, Pant, Gloves, Rubber insulating Gloves Class 2 in Kit Bag

Features

Fabric Composition:

Inherent Fabric : 65% Modacrylic, 33% Meta-Aramid & Para-Aramid and 2% Antistatic fiber.

Inherent arc thermal performance value is decided by its molecular structure. The fiber will not be burned inherently. Its flame resistance comes from the fiber itself instead of the chemicals on the surface. Thus, the flame resistant performance is permanent and will not be washed out or worn away.

ATPV=25cal/cm2

Comfortable:

In a survey, compared with common flame resistant cotton, Nylon blended fabric and aramid fabric with the same grams, ArcPro is more comfortable. It performs much better in the feelings of stabbing, weight, flexibility, stiffness, close-fitting, stuffiness and itchiness.

Durable:

With much long life, its inherent permanent protection will not degrade by washing or wearing. And the fastness is two times of common flame resistant cotton and Nylon blended fabric.
