

Product Name :
Electrical Arc Flash Arc Flash 40cal-cm2

Product Code :
NLAB-SAFETYLABP12004

Description :

Electrical Arc Flash Arc Flash 40cal-cm2

Technical Specification :

Material: ArcPro inherently flame retardant fabric

Style: Jacket, Bib-overall, Hood, Gloves, Class rubber insulating Gloves class 3 in Kit Bag

Grammage 15.7oz/yd2 (530g/m2)

Product: 40cal Arc Flash Protective Suit

Features

Fabric Composition:

65% Modacrylic, 33% Meta-Aramid & Para-Aramid and 2% Antistatic fiber.

Inherent arc thermal performance value is decided by its molecular structure. The fiber will not be burned inherently. Its flame resistance comes from the fiber itself instead of the chemicals on the surface. Thus, the flame resistant performance is permanent and will not be washed out or worn away.

ATPV=40cal/cm2

Comfortable:

In a survey, compared with common flame resistant cotton, Nylon blended fabric and aramid fabric with the same grams, ArcPro is more comfortable. It performs much better in the feelings of stabbing, weight, flexibility, stiffness, close-fitting, stuffiness and itchiness.

Durable:

With much long life, its inherent permanent protection will not degrade by washing or wearing. And the fastness is two times of common flame resistant cotton and Nylon blended fabric.
