

Product Name :
Fibre-Optic Simplex Digital Transceiver Trainer

Product Code :
NLAB-ELECTRONICSAB240009

Description :

Fibre-Optic Simplex Digital Transceiver Trainer

Technical Specification :

Fibre-Optic Simplex Digital Transceiver Trainer has been designed specifically for the study of characteristics & propagation delay in digital fibre optic transmission systems. Practical experience on this board carries great educative value for science & engineering students.

Object:

Design & study of a fibre-optic Digital link.

Study of Rise-Time and Fall-Time distortions

Study of Propagation Delay.

Features:

The board consists of the following built-in parts:

Two isolated IC Regulated D.C. Power Suppliers.

Timer IC for Square Wave Frequency Generator.

Three potentiometers to vary R (Threshold Resistance), R (Input Resistance) and frequency. TH IN

Fibre Optic Digital Transmitter @ 660nm

Fibre Optic Digital Receiver.

Adequate no of other electronic components.

Mains ON/OFF switch, Fuse and Jewel light.

The unit is operative on 230V±10% at 50Hz A.C. Mains.

Adequate no. of patch cords stack able 4mm spring loaded plug length ½ metre.

Weight : 3 Kg. (Approx)

Dimension : W 340 x H 110 x D 210

Other Apparatus Required:

Digital Multimeter

Cathode Ray Oscilloscope 20MHz
