

Product Name :
Fire Proximity Alumunised Suit

Product Code :
NLAB-SAFETYLABP12026

Description :

Fire Proximity Alumunised Suit

Technical Specification :

Construction: The outer layer of the suit is made of aluminised aramid fabric. The inner layer is made of woolen fabric lining and the third layer is made of flame retardant cotton cloth. All stitches are done with heavy-duty aramid thread. The construction of the material is user durable, non-allergic, and skin-friendly.

Coverall: One-piece coverall with or without pouch to keep breathing apparatus.

Jacket and trouser: Jacket with or without pouch to keep breathing apparatus.

Applications: These suits are used widely in intense heat, fire, steam and hot liquid. Alumunised.

Accessories:

Hood consists of FRP helmet with mica and tinted polycarbonate visor.

One pair of shoes made of aramid upper and nitrile sole.

One pair of aluminised leg-guard.

One pair of aluminised gloves.
