

**Product Name :**  
High School Microscope

**Product Code :**  
NLAB-EDUSCHOOLEQ173087

**Description :**

High School Microscope

**Technical Specification :**

The 2nd eyetube allows for the addition of a microscope camera, or multiple students can view specimens at the same time.

The 5 position disc diaphragm helps adjust the amount of light that passes through the specimen and will allow for crisp images.

A head that rotates makes it easier to position students around the microscope.

LED lighting is cool and will not harm living specimens.

Separate Coarse & Fine focusing knobs are important. Without a fine focusing knob, it is very hard to get a crisp and clear image at 400x or higher magnification.
