Product Name:

K-Slump Tester

Product Code:

NLAB -CONCRLAB120031

Description:

K-Slump Tester

Technical Specification:

The operation is very simple: insert the tester into the concrete up to the level of the disc, after 60 seconds, a measuring rod in lowered onto the surface of the concrete and the K-slump is read directly on a scale. The calibrated hollow tube has a dia. of 20 mm.

K-Slump Tester for in-place measurements indicates correlation to the slump test. The probe determines workability of concrete and the degree of compaction. Includes correlation chart and instructions.
