

Product Name :
Peel Off Strength Tester Machines

Product Code :
NLAB-TESTINGLABM54001

Description :

Peel Off Strength Tester Machines

Technical Specification :

Peel Off Strength Tester to test the self-adhesiveness of foam sheet. The strength of adhesion of self-adhesive foam sheets to the substrate is determined by pasting a rectangular test specimen cut out of the sheet under test over a smooth glass surface, pressing it down with the help of rubber-lined metal roller, and peeling off one of its ends from the substrate at an angle of 180°; at a constant speed with the help of a motorized arrangement. & The force needed to peel off the test specimen gives a measure of the peel strength of the foam sheet under test
