

Product Name :
PH Tester

Product Code :
NLAB-LBEMALAB230039

Description :

PH Tester

Technical Specification :

The Plus are the next generation of the Checker pH tester. The Checker is by far one of the most popular pH meters in the world with over 1 million meters used since its introduction in 1991. From students to researchers, the Checker has been helping people with their pH measurements as a meter that is simple to use and operate.

These Checker pH testers have been designed with many advanced features while maintaining the look and feel of the original Checker. The Checker Plus and Checker now offer automatic calibration to one or two points, automatic buffer recognition, calibrated buffer tags, stability indicator, low battery indicator, and automatic shut off. Both the Checker and Checker Plus maintain the iconic pentagon design with a probe measuring 103 mm in length that is tapered to an 8 mm diameter, making it ideal for measurements in test tubes and vials.
