

Product Name :
Power Electronics Workshop

Product Code :
NLAB-ELECTRICALAB140005

Description :

Power Electronics Workshop

Technical Specification :

Power Electronics Workshop - Power Electronics Training System - This is the combination of power, electronics, and control. It has wide the applications of solid-state electronics to the control and conversion of electric power. Popular circuits of power electronics contain rectifiers, choppers and inverters. The experimental for modules includes converter, power supply, load, control and testing modules. These experimental modules and instruments will be introduced and demonstrated in the subsequent experiments.

Description

The Power Electronics Training System consists of 28 experimental modules, a three-phase squirrel cage motor, load, control and measuring devices. It include single-phase rectifiers, three-phase rectifiers, DC choppers, inverters and application experiments.
