RFID TRAINER is an excellent learning/ training system for understanding basics, working and application of RFID (Radio Frequency Identification). It comprises of Contactless RFID Reader, 5 Mifare contactless cards, RFID Applications/Demo/Video Software. System works on 13.56 MHz and ISO 14443A read and write support. RFID is an automatic identification technique, storing and retrieving data using RFID tags or transponders. RFID tags (Active or Passive) is stuck into a product, animal or person for identifying using radiowaves. Most RFID tags have 2 parts: Integrated circuit for storing, processing information, modulating/ demodulating a RF signal and Antenna for receiving/ transmission. Applications for RFID includes transport payments, product tracking, animal identification, inventory systems, human implants, libraries etc.
