

Product Name :
Signal/Functional Generator

Product Code :
ES111

Description :

Signal/Functional Generator

Technical Specification :

Low Distortion Function Generator has linear Frequency Scale very low Distortion and constant signal amplitude with the output Signal Symmetry about Zero.
The DC coupled output provides square wave without any appreciable Sag at low frequency.
The output is protected against short circuit.
It has a offset control provided to shift the base line of signal by ± 10 volts.
The continuously variable DC offset control further enhances the versatility of the instrument.
Ac and DC out generating.
