

Product Name :
Soil Augers

Product Code :
NLAB-SOILELAB140016

Description :

Soil Augers

Technical Specification :

Clay Augers have an open bit design and work well for sampling cohesive soils. Available in 3in (76mm) and 4in (102mm) diameters.

Sand Augers are designed for sampling looser, granular soils and have closed bits to retain cuttings. They are available in 3in (76mm) and 4in (102mm) diameters.

Mud (Dutch) Augers are best-suited for sampling muck-like, boggy, and root-bound soils. This auger offers an open design and is available only in 3in (76mm) diameter.

One-Piece Soil Samplers are available with 11in (279mm) or 14in (360mm) lengths. They have a T-handle and steel construction that allows penetration into sampling tougher soils.

Quick-Connect Auger Adapter is required to connect augers and older-model extensions with threaded connections to quick-connect components.

Quick-Connect Pins are required for connecting Augers and Extensions in quick-connect configurations.

Handles & Extensions connect to augers and help achieve greater depth penetration into the soil. They range in length from 2 to 5ft (610 to 1,524mm). Handles have a T-design to help easily guide the extensions deeper.
