

Product Name :
Strength Measurement Complement For Six Axis Platform System

Product Code :
NLAB-TECHNICALAB30023

Description :

Strength Measurement Complement For Six Axis Platform System

Technical Specification :

Associated with the strain bridge and the specific software interface (included in the software), this instrumentation aims to determine the strength applied on the higher part of the platform which can be subjected to efforts of various natures weight. It makes it possible moreover to determine by experiments the stiffness of the controlled axis.

In addition, the 6 axis platform thus equipped can represent a components and materials model of testing machine.

Essential requirements

Six axis platform.

This complement can be mounted :

When purchasing the 6 axis platform.

Later by returning the platform to the factory in order to upgrade it.
