

**Product Name :**  
Thermal Conductivity of Building Materials Apparatus

**Product Code :**  
NLAB-ENGINEERINGLB56012

**Description :**

Thermal Conductivity of Building Materials Apparatus

**Technical Specification :**

Determination of the thermal conductivity of building materials

Thermal conductivity and thermal resistance measurement in accordance

Reproducible clamping pressure due to clamping device

8 specimens to be put between hot and cold plate

Hot plate with heater mat

Cold plate with water cooling and heat flux sensor

Software controllers for temperature adjustment of hot and cold plate

3 temperature sensors for the cooling water: at inlet, at outlet and a mid temperature of the hot and the cold plate

2 temperature sensors for surface temperature.

#### Technical Data

##### Electric Heater Mat

Power: 500W

Max. temperature: 200°C

##### Specimens

lxLxW: 300x300mm

Thickness: up to 50mm

Material: Armaflex, grey cardboard, PMMA,

Polystyrene, PS, POM, cork, plaster

##### Measuring Ranges

Temperature: 3x 0...100°C, 2x 0...200°C

Heat flux density: 0...1.533W/m<sup>2</sup>
