|--|--------------------------------|

**Description :**

Trainer For the Study of Alternator, Parallel Operation and Generation Protection

**Technical Specification :**

The modularity of this didactic system grant to the students a direct and immediate approach to the topic, offering the opportunity to study various subjects performing different experiments:

no-load test

Short - circuit test

Load characteristics

Regulation performance characteristics

Manual synchronization procedure

Automatic synchronization procedure

Power factor characteristics

Overcurrent protection

Over-voltage or under-voltage protection

Over-frequency or under-frequency protection

Unbalance protection

Earth protection
