

Product Name : Trainer for The Study of Energy Utilization	Product Code : ES854
Description : Trainer for The Study of Energy Utilization	
Technical Specification : This trainer have modular structure and it consist of didactic panels that installed on a vertical frame. The modularity of this didactic system grants to the students a direct and immediate approach to the topic, offering the opportunity to study various subjects performing different experiments: Demonstration of the manual operation on the control of reactive power at various inductive loads Demonstration of the automatic operation on the control of reactive power at various inductive loads and at different sensitivities Demonstration of the measurement of active energy consumption Demonstration of the measurement of reactive energy consumption Determination of the meter's constant Demonstration of the measurement of the maximum demand Demonstration of load cut-off operation
