

Product Name :
Trowels

Product Code :
NLAB-LBEMALAB230042

Description :

Trowels

Technical Specification :

Brick Trowel: Slightly rounded, diamond-shaped blade / Designed for laying brick, laying block, tamping and cutting bricks
Finishing Trowel: Large, flat rectangular blade / Used to smooth a surface after concrete has begun to set
Gauging Trowel: Rounded tip, v-shaped back / Designed for gauging, or mixing in specified proportions, small amounts of quick set plaster.
Margin Trowel: A tool with a V-shaped back but a rectangular front / Used to mix thinset and other material, for scooping and spreading material such as adhesives in tight spots.
Magnesium Masonry Hand Float: Floating helps remove imperfections and produces a flatter surface. It also compacts the slab and the mortar at the surface in preparation for later finishing operations.
Pointing Trowel: Smaller version of brick trowel / Used to separate concrete from the forms it is poured into, finishing joints in brick walls, and for spreading material in tight spots, filling in small cavities.
