

Product Name :
Valva Suturing Training Simulator

Product Code :
NLAB-MEDICALMODELAB11039

Description :

Valva Suturing Training Simulator

Technical Specification :

The simulators provide students with a variety of repair experiences without the constraint of time and concern for safety, which are factors with a live patient.

The simulators can be used by the student in a learning lab with an instructor, or by the student individually in the clinical setting just prior to a patient experience.

They are also useful as homework teaching aids that can be signed out at night and returned the next day.

In addition to being portable, the lifelike texture allows the learner to develop a “feel” for instrument handling, tension on suture, and the advantages of one method of tying knots over another.
