

Product Name :
VICKSBERG Penetrometer

Product Code :
NLAB-TESTINGLABM109022

Description :

VICKSBERG Penetrometer

Technical Specification :

This is for determining the bearing capacity of sub grades or for compaction control. It is also used for rapidity of soils in shallow exploration work.

Specification :

Consists of a sturdy handle under which is fixed a sensitive proving ring. An extension piece is fixed to the bottom of the proving ring and carries a detachable penetration cone at its tip. Proving ring capacity 100 kg (1kn) and 0.002mm dial gauge provided indicates the penetration load applied.
