#### **Product Name:**

Wind and Solar Hybrid System

#### **Product Code:**

NLAB-ENGINEERINGLB43003

## **Description:**

Wind and Solar Hybrid System

## **Technical Specification:**

## This Wind and Solar Hybrid System

is designed to demonstrate to students not only the working principle of basic wind generation system, but also simulation of a wind generation system for standalone or grid-connected operation.

#### This unit consists of:

- Wind turbine
- Blower fan
- Charge controller
- Battery
- DC-to-AC inverter

Phone: +91-9896600003

Email: sales@naugralabequipments.com

- · Voltmeter and ammeter
- Load centre (AC and DC load)

## **Experimental capabilities:**

- Functional and operating principles of wind power generation
- Determination of electrical conversion efficiency relative to wind power
- · Measurement of wind turbine power output characteristics under load
- Measurement of overall system performance under load
- Examination of battery charge management system
- Installation and testing of standalone inverter system in direct operation
- Installation and testing of standalone inverter in storage operation
- Installation and testing of standalone inverter for the 230 VAC voltage generation
